1. What's the best email to use.
 2. Let me know when you get this one.
 3. Below is a memo I sent you some time back. Did the email get to you? Did the memo get sent? Did you get an answer?
- Ms. Machaeavelli

Engineering,

I'm interested in learning about the capacity of Bridge Rd. as a two lane road.
You'll have to start with traffic engineering for dummies. This is not my field of expertise.

I'd like to know several things:

1. How have the trips per day (or do you do trips per peak hour?) increased over the last ten years between I95 and US1?
2. What capacity is available as of this year?
3. How does that capacity translate into number of single family homes? That is, if I put a new development west of US1 How many more homes could be added before the road reached capacity?
4. Can you give me an example I could drive on and observe of a two lane road in Martin County that is currently just about at the limit of it's capacity?
